Any change so effected, will be applicable for a minimum of 1 (one) policy year. Interest rate equal to the applicable reverse repo rate plus 0.50% rounded up to the nearest 25 basis points will apply on the Guaranteed Income so accumulated and this rate will be reviewed bi-annually. The applicable interest rate for a financial year will be based on the reverse repo rate applicable as on the respective 1st day of April and October of every financial year. You can withdraw the Guaranteed Income so accumulated in full or in part, any time during the policy term. Any accumulated Guaranteed Income, if not already withdrawn and is excluded from the calculation of maturity benefit or death benefit or benefit payable on surrender of the policy, will be paid in full as lumpsum upon termination of the policy respectively due to maturity of the policy or death of the life assured or surrender of this policy, whichever is earlier.

#### D.1 Lumpsum Maturity Benefit

Variant	Maturity Benefit will be equal to:
Lumpsum Benefit	Sum Assured on Maturity + Accrued Special Additions, if any
Income Benefit	Maturity benefit will not be applicable under this variant

Income Plus Lumpsum Benefit	<p><b>If Guaranteed Income (GI) payout starts during Premium Payment Term (GI starts in 1st, 2nd or 5th policy year), then,</b></p> <ul style="list-style-type: none"> <li>• Sum Assured on Maturity + Accrued Special Additions, if any</li> </ul> <p><b>If Guaranteed Income (GI) payout starts after completion of Premium Payment Term (GI starts in PPT+1st or PPT+2nd, PPT+4th or PPT+6th policy year), then,</b></p> <ul style="list-style-type: none"> <li>• Sum Assured on Maturity which will be equal to 50% or 100% or 150% of Total Annualized Premium payable.</li> <li>• Any one of the Sum Assured on Maturity percentages (as mentioned in previous bullet point) can be chosen by you at inception and the corresponding Guaranteed Income amount will be arrived at and communicated to you.</li> </ul>
Whole Life Benefit	<ul style="list-style-type: none"> <li>• Sum Assured on Maturity, which will be equal to 100% of total annualized premiums payable under the policy.</li> </ul>

Sum Assured on Maturity shall be equal to the specified percentage of Total Annualized Premiums payable during the Premium Payment Term.

Special Additions shall accrue at specific Policy anniversaries during the Policy Term as given in the Table 1 and shall be payable on policy maturity date or on death of life assured or surrender of the policy, whichever is earlier.

**Table 1: Special Additions as a % of Annualised Premium**

Policy Anniversary	Policy Term less than 20 years	Policy Term greater than or equal to 20 years
(PT minus 11)th	NA	4%
(PT minus 6)th	NA	5%
(PT minus 5)th	1%	NA
(PT minus 4)th	2%	NA
(PT minus 3)rd	3%	NA
(PT minus 2)nd	4%	NA
(PT minus 1)st	10%	12%

- Under Lumpsum Benefit variant, Special Additions shall be applicable only when policy term is more than 5 years.
- Under Income plus Lumpsum variant, Special Additions shall be applicable only when the Guaranteed Income (GI) commences during the chosen premium payment term (i.e when GI starts in 1st or 2nd or 5th policy year).
- Special Additions shall not accrue in case of policies which are in lapsed status or have acquired reduced paid-up status.

**D.2 Staggered Maturity Benefit (applicable in case of Lumpsum and Income Plus Lumpsum variants only)**

Under these two variants, instead of receiving maturity benefit as a lumpsum amount on policy maturity date (as mentioned above), you will have the option to receive maturity benefit in the form of regular stream of Guaranteed Income after the policy maturity date, over a chosen period called staggered maturity period and a lumpsum amount (if opted for) at the end of such staggered maturity period. However, no death benefit will be available during the staggered maturity period.

The stream of Guaranteed Income commencing after the policy maturity date and the lumpsum amount payable (if opted for) at the end of such staggered maturity period, put together is called Staggered Maturity Benefit.

You have the option to receive the level or increasing Guaranteed Income while opting for staggered maturity benefit. Under increasing Guaranteed Income, you can choose one of the following two sub-options:

**a. Increasing every year** - The Guaranteed Income will increase at a simple rate of 5% p.a. during staggered maturity period.

**b. Increasing every 5 years** - The Guaranteed Income will increase at a simple rate of 15% once in every 5 years during the staggered maturity period.

You can choose this option of Staggered Maturity Benefit either at inception of the policy or during the last policy year, but at least 6 months before the policy maturity date.

**In case, you choose Staggered Maturity Benefit at inception:**

- The minimum staggered maturity period shall be 2 years and maximum staggered maturity period shall not exceed 50 years minus policy term.
- The Guaranteed Income payable during the staggered maturity period along with a lumpsum amount, if opted for, at the end of such staggered maturity period will be communicated upfront to you. In case you decide to have a lumpsum amount at the end of staggered maturity period, you will have the option to decide the lumpsum amount by choosing it as a percentage of the sum total of annualized premiums payable during the policy term.

**In case, you choose Lumpsum Maturity Benefit at inception but decide to have Staggered Maturity Benefit during last policy year:**

- Prevailing interest rate will be applicable as on date of receiving request for staggered maturity benefit. The prevailing G-Sec interest rates as per the following table (Table 2) shall be used for deriving staggered maturity benefit while applying explicit loading of 1%:

**Table 2:**

<b>Staggered Maturity Period</b>	<b>Prevailing G-Sec rates</b>
Up to less than 5 years	Prevailing G-Sec rates of 5 year term
5 to 9 years	Prevailing G-Sec rates of 10 year term
10 to 14 years	Prevailing G-Sec rates of 15 year term
15 years and above	Prevailing G-sec rates of 20 year term

- Using the above-mentioned interest rates in Table 2, 99% of the lumpsum maturity benefit amount available at policy maturity date will be considered for the equivalent Guaranteed Income during staggered maturity period or Guaranteed Income during staggered maturity period plus lumpsum Benefit at the end of such staggered maturity period, as the case may be.
- Any change in the basis of determining the rate for such Staggered Maturity Benefit shall be made by the Company with prior approval of IRDAI.
- The basis of determination of Benefits under Staggered Maturity can be changed only after approval of IRDAI.
- Staggered maturity period cannot be more than 50 years when this option is chosen during the last policy year.

Any time during the staggered maturity period, or if staggered maturity benefit is chosen at the inception of the policy, then during the last policy year as well, you can commute all future Guaranteed Income payouts (or in case of death of life assured during staggered maturity period, nominee can also decide to do the same) to receive the lumpsum amount. The value of such lumpsum amount will be 99% of net present value of outstanding payouts using the applicable interest rate as on the date of exercising commutation option. The applicable rate will be the prevailing G-Sec interest rates as per the Table 2 corresponding to the outstanding staggered maturity period. On exercising the option of commutation during the staggered maturity period, all the benefits and rights under the policy shall terminate.

**E. Optional Benefits**

You can choose one or more optional benefits at the inception of the policy, subject to terms and conditions of the policy. These optional benefits are not applicable for single pay and point of sale (POS) policies.

**E.1 Policy Continuance Benefit on Death:** This option can be chosen only under Lumpsum Benefit, Income Benefit and Income Plus Lumpsum Benefit variants.

If "Policy Continuance Benefit on Death" is chosen by you, then upon death of the life assured any time during the policy term, following benefits will be paid to the nominee:

- a) Death Benefit equal to Sum Assured on Death will be immediately paid as a lump sum amount
- b) All future survival benefits and / or maturity benefit, (as applicable depending upon the variant chosen) will be paid to the nominee/beneficiary as and when due, without payment of any future premiums, as would have been the case had the life assured been alive and would have been paying the premiums.

Policy Continuance Benefit on Death can be chosen only when policyholder and life assured are same.

### **E.2 Family Income Option:**

This option can be chosen only under Income Benefit variant and Income Plus Lumpsum Benefit variant.

Under this option, upon death of life assured during the policy term, following benefit will be paid to the nominee in addition to lumpsum death benefit:

50% of the Guaranteed Income (as applicable on date of death of Life Assured or first instalment of Guaranteed Income, whichever is higher), which was payable as Survival Benefit to the Policyholder, shall be paid to the nominee as and when due during the remaining Income Period or for 10 years, whichever is higher

### **E.3 Policy Continuance Benefit on diagnosis of Critical Illness:**

This option can be chosen only under Lumpsum Benefit, Income Benefit and Income Plus Lumpsum Benefit variants.

Under this option, in case the life assured is diagnosed with any of the listed critical illness condition during the policy term, then on admission of claim, following benefits shall be payable:

- a. Additional critical illness benefit equal to 5 times of annualized premium will be paid in lumpsum. Here additional means, this critical illness benefit will be over and above the death benefit under the policy and will not be deducted from the death benefit.
- b. The policy will continue and future premiums, if any, will be waived off.
- c. All future survival benefits and / or maturity benefit (as applicable depending upon the variant chosen), will be paid as and when due under the policy.
- d. The additional critical illness benefit under this option shall be applicable till the end of chosen policy term or till life assured attaining age 75 years, whichever is earlier.
- e. However, on occurrence of death of life assured anytime during the policy term, applicable death benefit will be paid to the nominee and policy will terminate upon payment of death benefit.
- f. Policy Continuance Benefit on diagnosis of Critical Illness can be chosen only when policyholder and life assured are same.

### **E.4 Senior Citizen Health Benefit:**

Under this option, in case the life assured is diagnosed with any of the listed critical illness post attaining age 60 years (as on last birthday) during the policy term, then on admission of claim, following benefits shall be payable:

- a. Accelerated Critical Illness Benefit equal to 5 times of Annualized Premium will be paid immediately. Critical illness benefit

under this option is an accelerated benefit and hence payment of this benefit will not be in addition to the applicable death benefit.

It only facilitates an earlier payment of a part (equal to 5 times of Annualized Premium) of applicable death benefit on prior occurrence of the Critical Illness.

- b. All future Guaranteed Income payouts, if any, will be increased by 5% and will be paid as and when due.
- c. You will have to continue to pay future premiums, if any,
- d. Maturity benefit will be paid to you as and when due.
- e. In case of death of life assured anytime during the policy term, prevailing death benefit reduced by accelerated critical illness benefit as mentioned in (a) under this option, if already paid earlier, will be paid to the nominee and the policy will terminate thereafter.
- f. The accelerated critical illness benefit under this option shall be applicable till end of policy term or life assured attaining age 75 years, whichever is earlier.

The conversion shall be effective from subsequent policy anniversary.

This option is not applicable for Whole Life Benefit variant.

**Option to reduce the Premium (applicable only for limited and regular pay policies)**

Once reduced, the premium cannot be subsequently increased and all outstanding benefits under the policy may be revised by applying a reduction factor subject to the minimum death benefit under this policy.

**Revised benefit amount will be calculated as given below:**

Revised Benefit amount =  $(T/\text{Premium Payment Term} \times B1) + ((\text{Premium Payment Term} - T)/\text{Premium Payment Term} \times B2)$ ; where T is the completed number of policy years for which the original premium has been paid, B1 is the original level of benefits payable and B2 is the revised level of benefits corresponding to the reduced premium while taking the premium size discount, if any, in consideration. Such change will become effective on the

policy anniversary date following the receipt of such request, subject to policy being in force. For non-annual premium payment frequency, instalment premiums are calculated by applying the loading factor as given below on annual premium:

Premium frequency	Loading factor
Monthly	4%
Quarterly	3%
Half-yearly	2%

**Change in Guaranteed Income payout frequency** You may choose to receive Guaranteed Income annually or monthly. Guaranteed Income shall be payable in arrears as per the chosen Guaranteed Income payout frequency. For calculating monthly Guaranteed Income, a loading factor of 4% shall be applied on Guaranteed Income with annual payout frequency (as explained with an example given below).

Example:

Guaranteed Income with annual payout frequency	Rs. 1,00,000
Loading amount to calculate the equivalent monthly Guaranteed Income	(Annual Guaranteed Income*4%) Rs.1,00,000 *4% Rs. 4,000
Equivalent monthly Guaranteed Income	(Annual Guaranteed Income – loading amount)/12 (Rs.1,00,000 – Rs. 4,000) / 12 Rs. 8,000 per month

The payout frequency of the Guaranteed Income payable during Income Period or during staggered maturity period (if staggered maturity benefit is chosen at inception) needs to be chosen at the inception of the policy or at the time of opting for staggered maturity benefit during the last policy year, as the case may be, and can be changed anytime later by submitting a request at least 30 days before the next anniversary, subject to terms and conditions of the Policy and will be effective from the next anniversary.
